

A Vulcan Materials Company

## CCA Crushed Concrete Aggregate

CCA is a recycled material prepared from concrete that has never been in service.

CCA is a viable material which is governed by specifications for highway applications.

The residual cementitious material in CCA improves the strength in base and sub-base applications

### APPLICATIONS

- Base
- Subbase
- Synthetic Reefs
- Shoreline Stabilization
- Fill Projects
- Landscaping

### BENEFITS

- May contribute to LEED credit.
- Virgin Recycled Material
- Economical
- Environmentally Friendly
- DOT permitted
- Improved base strength

For orders or information please contact your local sales representative or our main office at 703-354-7100 x 214
